

Corporate Insurance & Risk Management Solutions

Protecting Your Business. People. Assets. Cash Flow.

Tarun Bhati | Commercial Line Expert
+91 90162 89118 | Tarun.bhati@policypact.com

One business. Multiple risks. One integrated insurance strategy.

Property Risk

Engineering Risk

Marine Risk

Liability Risk

Employee Risk

Financial Risk

Cyber Risk

Business
Interruption Risk

Vehicle / Fleet Risk

Credit Risk

10 risk categories. One coordinated insurance and risk-management programme.

The lowest premium is not the same as the right protection

COMMON ISSUES WE SEE IN CORPORATE PROGRAMMES

Gaps usually surface at claim time. A broker's job is to find them before that.

Property / Fire Insurance

Protect the balance sheet and the income stream

THE RISK *A fire or explosion can damage assets and stop operations at the same time.*

WHAT IT PROTECTS

- Buildings, plant & machinery, stock
- Furniture, fixtures & electrical installations
- Fire, lightning, explosion / implosion
- STFI and earthquake, where applicable
- Other perils through extensions, by policy structure

KEY EXTENSIONS

BI / Loss of Profit • Debris Removal • Reinstatement Value • Escalation • Accidental Damage • Floater • Machinery Breakdown

WHY IT MATTERS

A major loss hits assets and revenue together. Insuring only physical assets can leave the income stream exposed if operations stop.

KEY USP

Protect the balance sheet AND the income stream.

COMMON COVERAGE GAP

Sum Insured set on book value, not replacement cost. Check: is yours based on current replacement cost?

POLICY PACT VALUE

Review valuation, extensions and the BI indemnity period; structure the programme with the right insurers.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Engineering Insurance

Machines and projects can fail suddenly

THE RISK *Idle machines and delayed projects keep costing money.*

WHAT IT PROTECTS

- Machinery Breakdown & Electronic Equipment
- Boiler & Pressure Plant
- CAR / EAR for construction and erection projects
- Contractors' Plant & Machinery
- Machinery Loss of Profit after a breakdown

THE KEY DISTINCTION

Physical Damage + Consequential Financial Loss. Sudden mechanical / electrical breakdown, testing & commissioning, downtime.

WHY IT MATTERS

Breakdown can halt production or delay project delivery. Lost revenue can exceed the repair bill.

KEY USP

Protect the machine. Protect the project. Protect the revenue.

COMMON COVERAGE GAP

A breakdown policy without a Loss of Profit extension: repair may be covered, downtime income may not be.

POLICY PACT VALUE

Map critical machines and project stages; align structure, deductibles and BI cover.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Marine Insurance

Your goods are exposed before they reach your balance sheet

THE RISK Goods can be damaged, stolen or lost anywhere between supplier and customer.

Supplier

Port

Transit

Warehouse

Customer

WHAT IT PROTECTS

- Marine Cargo: import, export, inland transit
- Project cargo and stock throughput, where applicable
- Annual Marine Open Policy / Open Cover
- Damage, theft, accidental loss, natural perils
- Loading / unloading and transit exposures

WHY IT MATTERS

One large transit loss, uninsured or wrongly valued, can become a P&L event.

KEY USP

Your goods are exposed before they reach your balance sheet.

COMMON COVERAGE GAP

Declarations and valuation not aligned to actual shipments and contract terms.

POLICY PACT VALUE

Review transit terms, declarations, valuation and cover structure.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Group Mediciclaim / Group Health Insurance

Employee benefits are a retention and talent strategy

WHO AND WHAT IS COVERED

- Employee, spouse, children; parents / in-laws by programme
- Hospitalisation and day-care procedures
- Pre & post hospitalisation, ambulance
- Maternity and newborn cover
- Critical illness / optional benefits, where applicable

PROGRAMME DESIGN AREAS TO GET RIGHT

- Sum insured and family definition
- Room-rent limits and co-pay
- Waiting periods and maternity limits
- Disease-specific sub-limits
- Network hospitals, cashless and claim service

Better Coverage

Better Employee Experience

Better Retention

KEY USP

**Employee benefits are not just an HR cost.
They are a retention and talent strategy.**

COMMON COVERAGE GAP

Room-rent caps and sub-limits that reduce claim payouts when a claim arises.

POLICY PACT VALUE

Benchmark design, negotiate terms and support claims service for employees.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Group Personal Accident (GPA)

High-value protection at an efficient cost

THE RISK *An accident can cost a life or a livelihood, and leave a family exposed.*

WHAT IT PROTECTS

- Accidental death
- Permanent total / partial disablement
- Temporary total disablement, where applicable
- Accident-related medical expenses, where included
- 24x7 and worldwide cover, where applicable

PROGRAMME NOTES

Employees and eligible categories, depending on programme. Cover basis (fixed sum or salary multiple) is set by the programme.

WHY IT MATTERS

Mediclaime pays hospital bills, not lost earning capacity. GPA adds a financial safety net for the family.

KEY USP

High-value employee protection at a relatively efficient insurance cost.

COMMON COVERAGE GAP

Sum insured not aligned to salary bands or grades, leaving senior staff under-protected.

POLICY PACT VALUE

Benchmark cover basis by grade and align GPA with the wider employee-benefit design.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Liability Insurance

Liability claims can reach the balance sheet fast

Commercial General

Third-party injury or property damage from operations

Public Liability

Claims from visitors or the public at your premises

Product Liability

Harm caused by goods you make or sell

Employers' Liability / WC

Employee injury arising out of employment

Professional Indemnity

Errors or omissions in professional services

Directors & Officers

Claims against directors and officers

Cyber Liability

Data breach and network-security claims

Employment Practices

Employment-related allegations, where applicable

WHY IT MATTERS

Legal costs, compensation and reputational damage from one claim can hit profits and lender confidence.

POLICY PACT VALUE

Review limits, wording and contract exposures.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Directors & Officers Liability

Protect the people making critical business decisions

THE RISK *Leadership decisions can be challenged, with personal exposure for those involved.*

WHAT IT PROTECTS

- Regulatory exposures and investigations
- Shareholder claims
- Employment-related allegations
- Corporate governance exposures
- Defence costs, subject to policy wording

WHAT TRIGGERS COVER

Claims alleging wrongful acts in a managerial capacity, subject to policy terms.

WHY IT MATTERS

Fear of personal liability slows decisions and complicates hiring of independent directors.

KEY USP

Protect the people making critical business decisions.

COMMON COVERAGE GAP

Limits too low for defence-cost-heavy claims; subsidiaries and retroactive date not reviewed.

POLICY PACT VALUE

Review limits, entities covered, retro date and exclusions against your governance profile.

Subject to policy terms, conditions, exclusions and applicable underwriting.

THE RISK *A cyber incident can stop operations and expose customer data at once.*

Cyber Attack

Business Interruption

Data Breach

Customer Impact

Regulatory / Legal Costs

WHAT IT PROTECTS

- Data breach response and notification expenses
- Business interruption
- Cyber extortion and data restoration
- Forensic and legal expenses
- Third-party liability

WHY IT MATTERS

Downtime, recovery cost and regulatory exposure can arrive together.

KEY USP

Cyber risk is a business continuity risk, not only an IT risk.

COMMON COVERAGE GAP

Limits chosen without estimating downtime cost or records at risk.

POLICY PACT VALUE

Assess exposure with IT and finance; compare wording and sub-limits.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Motor / Fleet Insurance

Insurance + claims management + loss control

THE RISK *Vehicles on the road create daily accident, liability and downtime exposure.*

WHAT IT PROTECTS

- Corporate and commercial vehicle fleets
- Employee vehicles, where applicable
- Own damage
- Third-party liability
- Add-on covers by fleet profile

FLEET MANAGEMENT

Also review: renewal alignment, driver safety practices, claims-frequency data.

WHY IT MATTERS

Frequent claims and third-party exposures add up; fleet-level data helps manage them.

KEY USP

Fleet Insurance = Insurance + Claims Management + Loss Control.

COMMON COVERAGE GAP

Vehicles renewed one by one, with no view of overall claims frequency.

POLICY PACT VALUE

Consolidate renewals, benchmark terms, support claims tracking and loss-control reviews.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Workmen / Employee Compensation

Meet statutory obligations, protect your people

THE RISK *Employees can be injured at work, and the employer carries the legal liability.*

WHAT IT PROTECTS

- Employee injury arising out of employment
- Employer liability under applicable law
- Statutory compliance support
- Employee protection
- Claims support through the process

WHY IT MATTERS

Unmanaged statutory liability can become a direct cash-flow hit, especially with large or contract workforces.

KEY USP

Meet statutory obligations while protecting your people and cash flow.

COMMON COVERAGE GAP

Wages or contract-labour headcount not declared accurately, creating disputes at claim.

POLICY PACT VALUE

Review declarations, contractor labour and principal-employer exposure; support claims.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Trade Credit Insurance

Protect receivables, support confident credit sales

THE RISK *A key customer's default can turn booked sales into bad debt.*

Sales

Credit

Receivable

Default Risk

Insurance Protection

WHAT IT PROTECTS

- Non-payment by insured buyers
- Buyer insolvency, as per policy
- Protracted default, subject to terms
- Cover within approved buyer limits
- Domestic and export receivables, where offered

WHY IT MATTERS

Receivables tie up working capital; one default can strain cash flow and bank lines.

KEY USP

Protect receivables. Support confident credit sales.

COMMON COVERAGE GAP

Concentration on a few large buyers, with no limits or monitoring in place.

POLICY PACT VALUE

Assess buyer profile and receivables; structure policy and approved limits.

Subject to policy terms, conditions, exclusions and applicable underwriting.

Surety Bonds

Financial credibility for contractual obligations

THE RISK *Contracts demand guarantees that can tie up bank lines and collateral.*

NO COLLATERAL

Depending on underwriting terms

NO CASH MARGIN

Depending on underwriting terms

WHAT IT COVERS

- Bid Bonds
- Performance Bonds
- Advance Payment Bonds
- Retention Money Bonds
- Contractual / regulatory guarantees, where applicable

COMMON COVERAGE GAP

Relying only on bank guarantees; collateral and cash margin depend on underwriting and are not guaranteed nil in every case.

POLICY PACT VALUE

Prepare underwriting submissions and approach relevant surety insurers to structure efficient terms.

Subject to policy terms, conditions, exclusions and applicable underwriting.

A single, coordinated partner across corporate insurance and surety

Corporate Insurance Expertise

Structuring programmes across property, liability, employee benefits and more.

Multi-Product Capability

One partner for insurance and surety bonds, reducing coordination effort.

Strong Insurer Relationships

Access to relevant insurers for competitive market placement.

Risk Advisory Approach

Insurance built around your actual risk profile, not just price.

Claims & Servicing Support

Assistance through the claims lifecycle and ongoing servicing.

Dedicated Relationship Management

A single point of contact for renewals, queries and support.

A single, coordinated partner across your corporate insurance and surety requirements.

CORPORATE INSURANCE HEALTH
CHECK

**The biggest
insurance gap is
often the gap you
don't know exists.**

We review:

Sum Insured adequacy

Business Interruption

Renewal strategy

A strategic insurance advisor, not just an intermediary

01

Risk Understanding

Understand the business before recommending insurance.

02

Programme Design

Build insurance around the actual corporate risk profile.

03

Market Access

Approach relevant insurers and structure competitive terms.

04

Negotiation

Negotiate coverage, pricing, deductibles and terms.

05

Claims Support

Assist throughout the claims lifecycle.

06

Renewal Strategy

Benchmark and redesign the programme before renewal.

07

Relationship Management

Single-point coordination for multiple insurance requirements.

***Risk.
Protection.
Partnership.***

Seven steps from understanding your business to managing your renewal

An annual review keeps the programme aligned as your business changes.

From insurance cost to risk management

This is a service approach. No premium savings or claim outcomes are promised.
